

bags
Made in Spain Since 1989

We have been innovating for more than 30 years **to give the best solutions to protect musical instruments** and travelling with them. Our cases are special because they are **handmade** and because we care about every detail of them. Working with important musicians is crucial for us because our products are the result of their experience.. BAGS cases are fully made in **our workshop in Spain**, from its design to the manufacturing process, up to the highest European quality standards. The main European instrument brands such as Buffet, **Engelbert Schmid**, **Paxman**, **Besson**, **Voigt**, **Kuhne**, etc ..., trust us to manufacture their cases.

1989 We started to make the first cases of the **Professional Line** main improvements of these cases were the use of high-density foams, the introduction of wood and paperboard protections to preserve the instruments and the incorporation of hangers and straps to ease transportation. All these improvements represented a breakthrough in the sector.

1995 Cases of **Confort line**, made with expanded polystyrene, provided more protection to the instruments, These cases had a lot of success among students and professionals in more than 20 countries. Their design set a benchmark in the sector and was used afterwards by numerous manufacturers

2000 We continued innovating with **EcoBags line**, by introducing new designs and improving their transport. Thanks to new handles, hangers, wheels and trolley system travelling with instruments became much more easy and comfortable.

2010 We introduced Fiberglass in our cases with **SuperBags line**. With this material we reduced the volume of the cases to facilitate their transport especially by plane. At the same time we kept the same protection standards, offering fancy and trendy designs. This line became very popular and the first option for professional musicians in more than 26 countries like Germany, Australia, Canada, USA, Spain, France, England, Netherlands, Italy and Japan.

2014 We developed **Evolution line**, As a result of our constant wish to protect, transport and maintain your instrument in perfect conditions **we did the impossible: to keep improving our cases**. This line marked a turning point in Bags. Our cases became not only better outside but also inside; new designs up-to-date made of fiberglass and top quality finishes along with a better use of space making them more versatile, ergonomic and lighter.

BAGS was founded by the **Rivera Mota** family, since **2019** the **Spanish Brass**, is in charge of this brand, developing new models for the brand itself and new designs for different International instrument makers that will soon be presented.

SAX CASES

CHARACTERISTICS:

All of our new generation **BAGS** cases incorporate significant improvements in terms of protection, functionality and versatility. Instruments are much better protected because they rest on three padded areas. In this way, the transmission of impacts is minimal and the drying of the pads is much easier. This model has been created for detachable neck saxophones. It can be comfortably carried as a backpack due to its two built-in ergonomic straps attached to the frame that make carrying the instrument easy and safe even on bicycle or motorcycle. It also features an external pocket for scores with capacity for a laptop or a tablet.

Instrument compatibility: Its new and versatile design allows it to be used with the most globally recognized current brands and models (Buffet, Conn, Jupiter, Keilwerth, Selmer, Yamaha, Yanagisawa, etc. ...), and also with vintage models (Martin, Buescher, etc.)

Weight.- 3'7 kg

Dimensiones Externas.- 22 x 48 x 39

VIENNA HORN CASE / EV-3

CHARACTERISTICS

The new **"Vienna Horn Case"** is inspired by the **EV-I (fixed) model**, designed exclusively for those professionals who use this particular horn model so popular in Austria and Germany

The body is even better protected due their padded areas and it is also covered and protected by an extra pad bag on top where the bell rests. In this way, the transmission of impacts is minimal. It can be comfortably carried as a backpack due to its two built-in ergonomic straps attached to the frame that make carrying the instrument easy and safe even on bicycle or motorcycle. It also features an external pocket for scores with capacity for a laptop or a tablet.

Weight: 3'5 kg
External Dimensions.- 33 x 41 x 60

NATURAL HORN CASE / EV-3

CHARACTERISTICS

This model has been conceived attending the needs of the Natural Horn players due the low quality and quantity of the existing cases.

It has a capacity for **10 separated crooks** with individual bags for each one. The body is well protected due their padded areas and it is also covered and protected by an extra pad bag on top where the bell rests. In this way, the transmission of impacts is minimal. It can be comfortably carried as a backpack due to its two built-in ergonomic straps attached to the frame that make carrying the instrument easy and safe even on bicycle or motorcycle. It also features an external pocket for scores with capacity for a laptop or a tablet.

Compact design Handmade
Big capacity:
From C alto to B basso (10 crooks)
plus one extra tuning slide
Maximum protection

High quality material
Backpack straps
One handle Measures: 63 x 47 x 34 cm
Weight: 3'5 kg (empty)

TROMBONE

CHARACTERISTICS:

All our new generation **BAGS** cases incorporate significant improvements in terms of protection, functionality and versatility.

The EV-II is the result of 3 years development of the EV-I to reach the following improvements:

1. **Slide & Body** are totally fixed due a new system of subjection.
2. **Best protection of the Slide.** It is stored in a bag glued to the lid, which not only protects the Slide, but also protects the Bell.
3. **More room for accessories,** 2 inner compartments and special space for 2 mouthpieces.
4. It can be comfortably carried as a backpack due to its two built-in ergonomic straps attached to the frame that make carrying the instrument easy and safe even on bicycle or motorcycle.

It also features an external pocket for scores with capacity for a laptop or a tablet.

Compatibilities: Model available for traditional models such as open warp with more common coupling with models of well known brands (Shires, Bach, Conn, Edwards, Jupiter, Khunl & Hoyer, Voigt, Stomvi, Schagerl, Yamaha, etc.).

TENOR TROMBONE CASE / EV-II

Weight: 3.8 kg

External Dimensions.- 28 x 30 x 92

BASS TROMBONE CASE / EV-II

Weight: 4'7 kg

External Dimensions.- 31 x 38 x 92

ALTO + TENOR TROMBONE CASE / EV-3

CHARACTERISTICS:

Specific Case for Alto + Tenor Trombone, both with / without trigger.

It has a central divider protection pad between the two instruments, plus 2 pockets for mouthpieces and accessories.

It also features an external pocket for scores with capacity for a laptop or a tablet.

It can be comfortably carried as a backpack due to its two built-in ergonomic straps attached to the frame that make carrying the instrument easy and safe even on bicycle or motorcycle.

Compatibilities: This model is specifically made for bell diameter of 23 for the Tenor Trombone and bell diameter of 18'5 for Alto Trombone.

This design allows it to be used with the most globally recognized current brands and models (Shires, Bach, Conn, Edwards, Jupiter, Khunl & Hoyer, Voigt, Yamaha, etc.)

Thanks to its measurements and its external aesthetics, it can be confused with a Viola or a Violin case, which it's sometimes very helpful at the boarding area.

Weight.- 4'8 kg

TRUMPET + TENOR TROMBONE CASE / EV-3

Weight.- 4'8 kg

External Dimensions- 25 x 25 x 91

DETACHABLE BELL TENOR TROMBONE CASE "FLIGHT"

CHARACTERISTICS:

It is our pleasure to introduce you our new **BAGS** case for **Detachable Bell Tenor Trombone**.

This case meticulously cares for all parts of the trombone (bell, body, and slide); whose elements are perfectly covered.

BELL: A "cap" has been designed for the bell that completely covers it with a soft velour textile and a hard part of lined cardboard, avoiding possible accidental impacts of any detachable element or other parts of the instrument.

BODY: It is totally fixed with a strap that prevents from any loosen or falling out of possible carelessness. In addition, the Body does not have any physical contact with the Slide or the Bell.

SLIDE: It is perfectly fixed and covered by a nylon textile, preventing any accidental impact from the body or bell.

It can be comfortably carried as a backpack due to its two built-in ergonomic straps attached to the frame that make carrying the instrument easy and safe even on bicycle or motorcycle.

Accessories compartments: The case has 2 sections to store them. It also features an external pocket for scores with capacity for a laptop or a tablet.

Weight.- 3'3 kg
